

# CP2

## Wire-Free Peephole Door Viewer

### See visitors, from wherever you are

With the CP2, you can now quickly and easily see visitors at your front door without having to lean against a tiny peephole. The CP2 fits into your existing peephole and turns it into a camera, so you know at a glance who is there and what is happening on the paired indoor screen, or even remotely via your mobile phone. Easy to install and powered by batteries, the CP2 gives you more visibility and protection in a matter of minutes.

Two Color Options

Live View  
from Anywhere

4.3-Inch  
Indoor Color Screen

1080p  
Resolution

146° Wide-Angle  
View

2,200 mAh  
Rechargeable  
Lithium Battery

Supports  
2.4 GHz Wi-Fi

Easy  
Installation

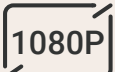

Fits 14-26 mm  
Hole

## Turn your peephole into a wide-angle, sharp camera

---

Stop worrying that you can't see well enough through a narrow peephole. With the CP2's smart lens, you can now get a much wider, clearer picture of who's coming and going. From the delivery person's face to what he is holding in his hands, it's hard to miss a thing.

 1080p Resolution

 146° Wide Field of View

 F1.6 Large Aperture

## Designed to blend in naturally

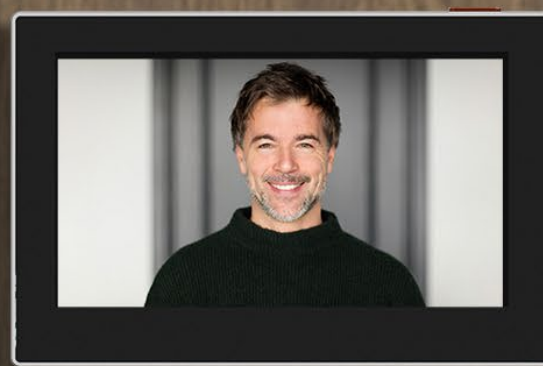

---

The compact camera fits elegantly into your door without being visually intrusive with two different color options. Apart from removing the existing peephole, no permanent changes or damage to your door are needed. It could also better protect your privacy, too. With the CP2 in place, people from the outside can no longer look into the hole.

## Your front-door security is now just a tap away

---

Whether you're out running errands or just too lazy to get off the couch, just use your phone to check on activities at the hallway. On the EZVIZ App, you can easily load live video to always stay in the loop.

4.3-Inch Color Screen

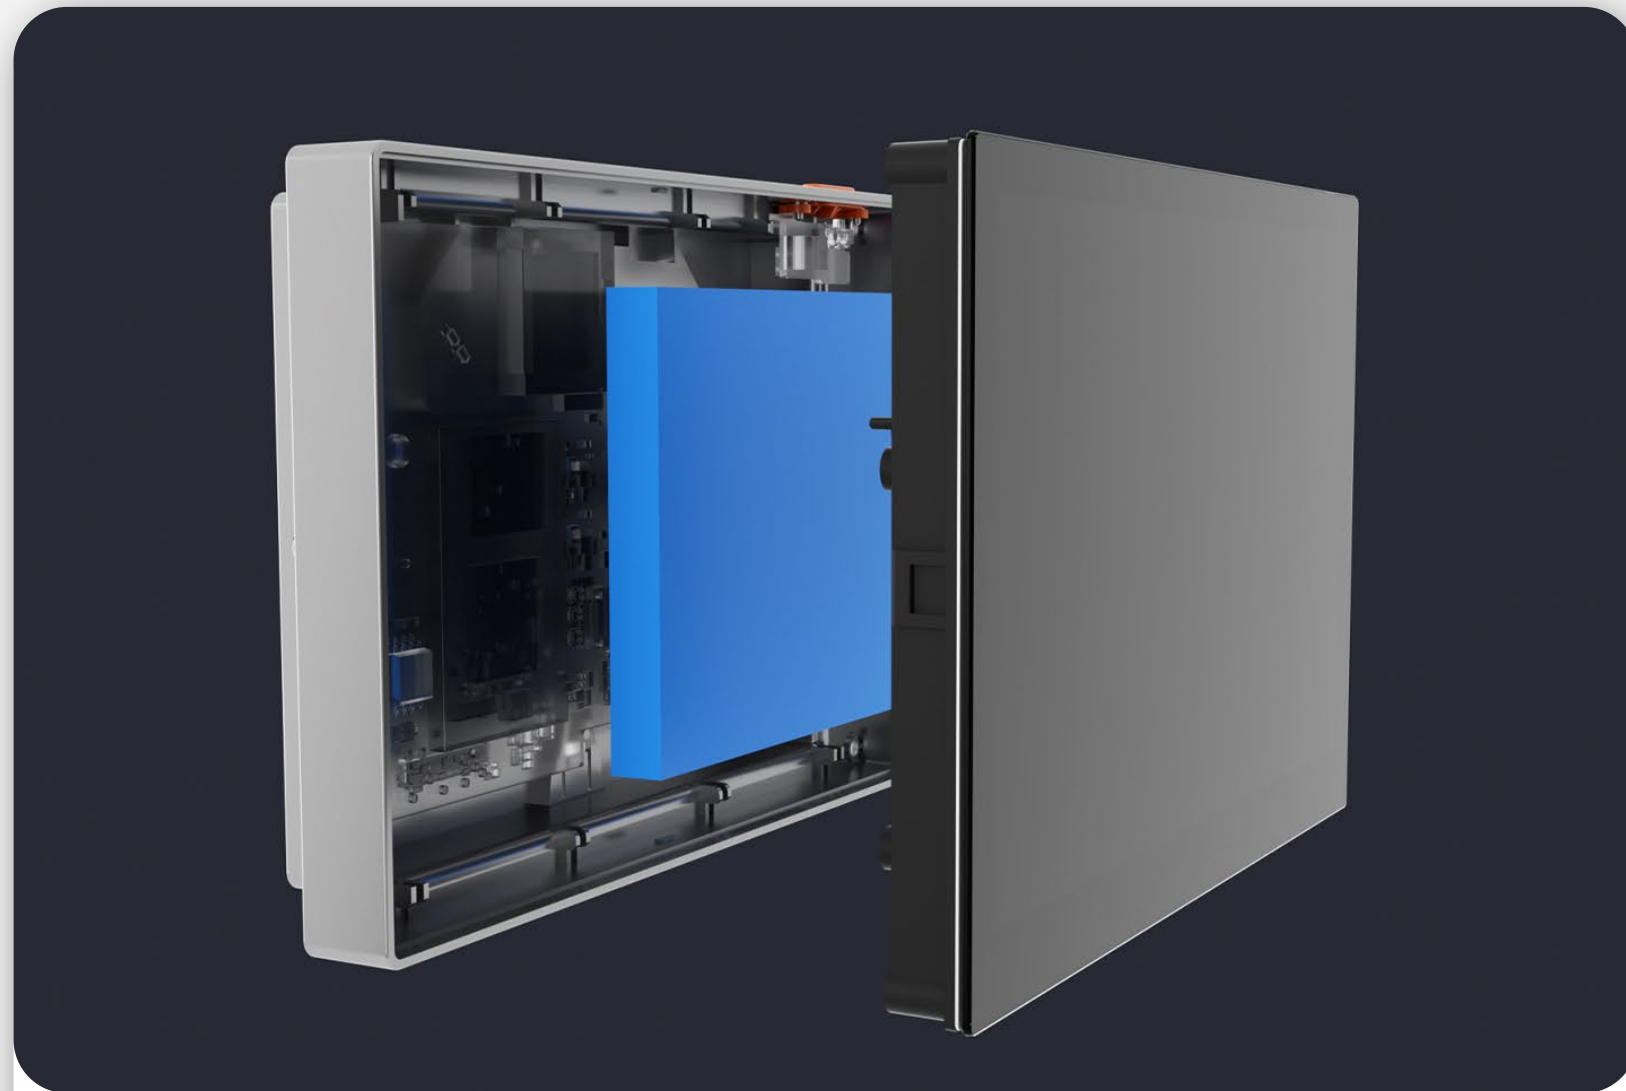

## View on a big screen, not through a tiny hole

---

With the CP2, you don't have to go all the way to the door before you know who's knocking. With the large 4.3-inch color screen right on the inside of your door, you can see live feeds and effortlessly identify visitors even from a distance.<sup>1</sup>

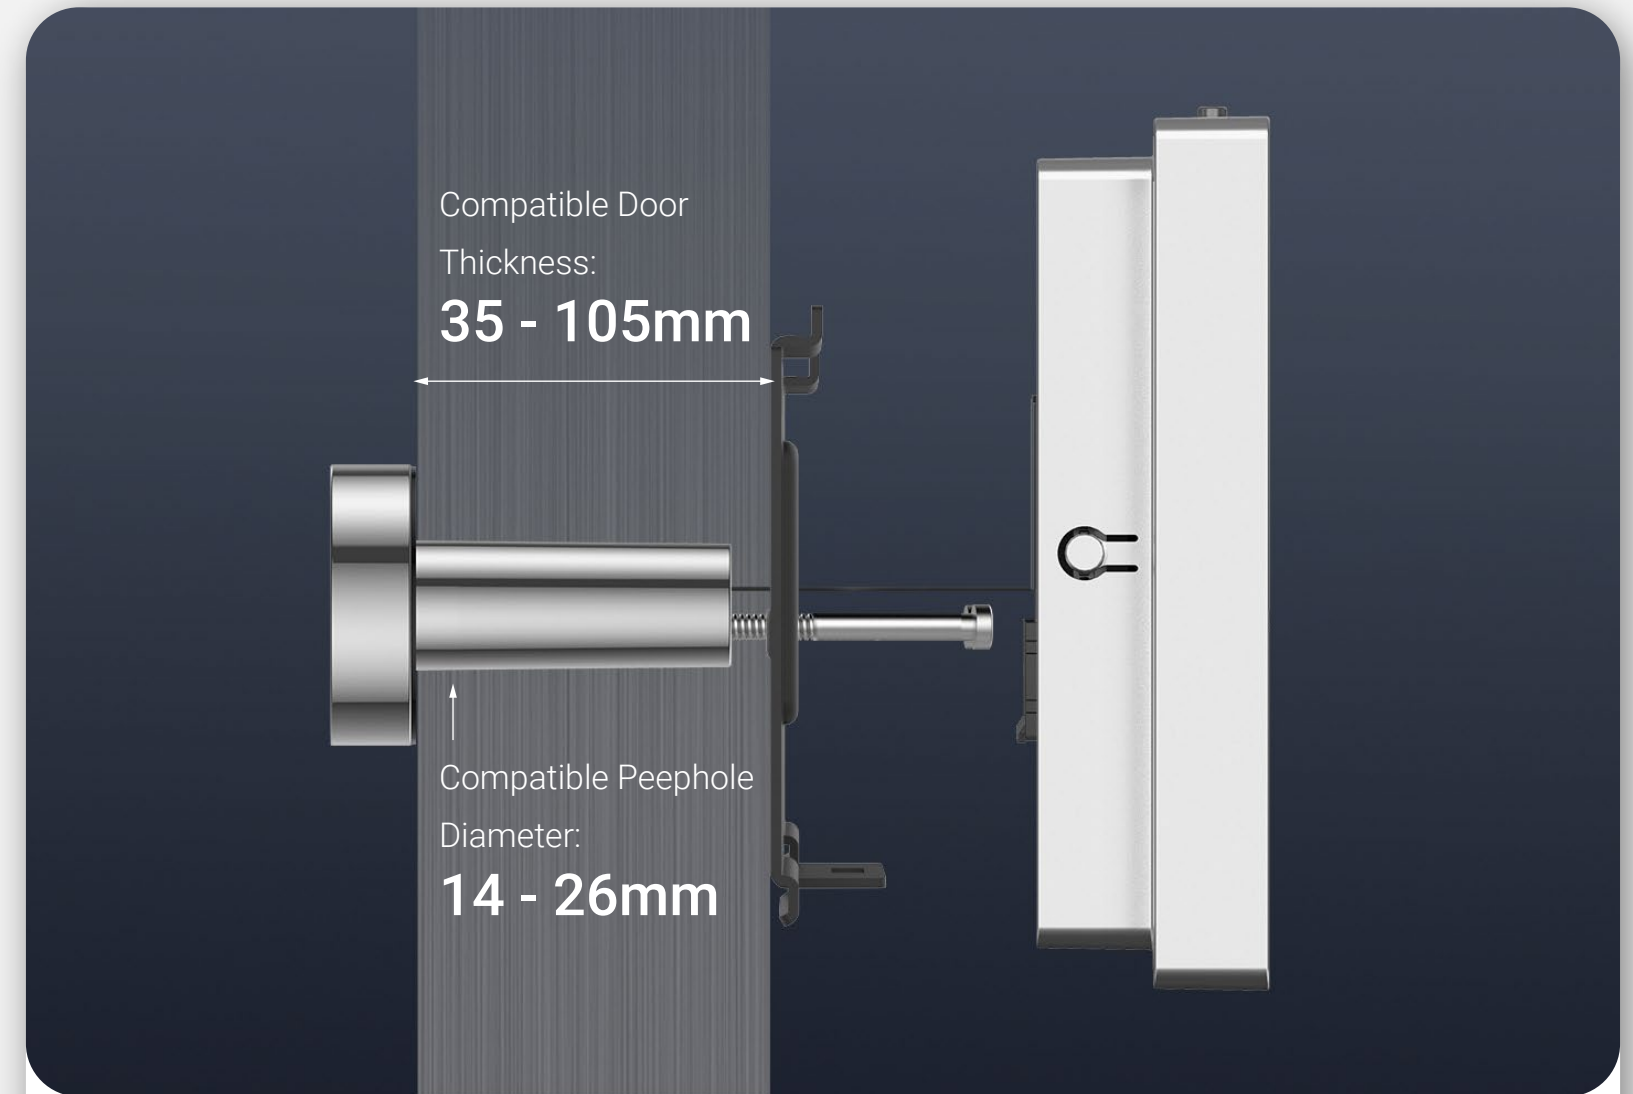

# A thoughtful product to see more, but worry less

## Made for long-lasting security

---

To guard the door and make you feel secure around the clock, the CP2 uses a built-in battery with a relatively long standby time, so you don't need to recharge it frequently.

## Built to fit easily and tightly

---

The CP2 is easy to install without complicated wiring or tools, as long as there's a compatible hole on your door. You can have the door viewer up and running in no time, all by yourself.

1 For the indoor screen to render live video feeds, users need to first manually switch on the screen with the physical button on the device body.

# Specifications

CS-CP2-R100-6E2WB-GD CS-CP2-R100-6E2WB-GR

## Installation Parameters

Supportive Hole Diameter	14 to 26 mm (0.55 to 1.0 inch)
Supportive Door Diameter	35 to 105 mm (1.38 to 4.13 inch)

## Camera Parameters

Sensor	1/3" Progressive Scan CMOS
Lens	2.0 mm @ F1.6, Visual Angle (Diagonal):146°
Max. Resolution	1080p / 2MP
